Professional Summary

B.Tech student in Computer Science and Information Technology with practical experience in Java web applications, frontend development, and machine learning projects. Completed a six-month online Web Development Internship at Curious Bay, working with HTML, CSS, JavaScript, React, Git, and GitHub. Experienced in AI-assisted development and prompt engineering. Interested in software engineering, full-stack development, debugging, and building reliable software solutions.

Technical Skills

Programming Languages: Java, Python, JavaScript, SQL
Web Development: HTML5, CSS3, React, Full-Stack Development
Java Technologies: Java Servlets, JDBC
Backend and APIs: FastAPI, REST API Development
Databases: MySQL, SQL Queries, SQL Joins, CRUD Operations
AI and Machine Learning: NLP, TF-IDF, Multinomial Naive Bayes, Scikit-learn, Text Preprocessing
Generative AI: Prompt Engineering, AI-Assisted Development
Tools and Platforms: Git, GitHub, VS Code, Apache Tomcat, Docker, Cloud Computing, CI/CD
Core Skills: Debugging, Problem-Solving, Teamwork, Communication, Adaptability, Version Control

Work Experience

Curious Bay **6 Months**
Web Development Intern | Online / Remote

- Worked with HTML, CSS, JavaScript, and React in a web development internship.
- Used Git and GitHub for source code management and version control during development activities.
- Practiced prompt engineering and AI-assisted development techniques to support coding and problem-solving.

Projects

AI-Powered Maintenance Chatbot for Electrical Substations

- Developed an end-to-end web chatbot to answer electrical maintenance questions using technical manuals and standard operating procedures.
- Built a FastAPI backend and PDF document-processing workflow to extract and retrieve relevant technical information.
- Developed a machine learning component to classify electrical fault conditions using electrical measurements.

Emotion Detection from Text Using NLP

- Built a Python and Streamlit application using TF-IDF, Multinomial Naive Bayes, and Scikit-learn for emotion prediction.
- Implemented text preprocessing, feature extraction, model training, and real-time prediction using the Cornell Movie-Dialogs Corpus; reported model result: 98%.

Smart Slot-Based Service Booking System

- Developed a Java Servlet web application using HTML, CSS, and MySQL for service booking management.
- Implemented booking, updating, and cancellation workflows using CRUD operations and database integration.

Education

Presidency University Expected 2027
B.Tech, Computer Science and Information Technology CGPA: 7.28
Sri Vidyaniketan PU College 2023 State Board – 79%
BVR E-Techno School 2020 State Board – 81%

Certifications

Web Development Certification | Java Certification | Full-Stack Development Certification

Languages

English, Kannada, Telugu
